

INTERMEDIATE & SENIOR ARCHITECTS

Verne Reimer Architecture (VRA) pursues projects that are intelligent, innovative, and meaningful, while delivering our work product within the budget, and scheduling requirements of the project. We create buildings and public spaces that provide functional and comfortable places that aim to inspire and delight. We are dedicated to creating timeless and robust buildings marked by resolving specific requirements with the proper technical considerations. We seek extraordinary and elegant results on all projects, including ordinary and unique programs, unusual sites, and modest construction budgets. All our projects integrate sustainability and accessibility as a primary consideration, while providing exceptional solutions for our client's needs and aspirations. Our studio focuses on a collaborative and integrated process.

VRA focuses on urban design, community/cultural, residential, commercial, industrial and recreation facilities. Our 20 staff members offer master planning, programming, urban design, architecture and interior architecture services. We currently have a large number of intriguing and diversified projects in conceptual and design development, ranging in both the public and private realms. We currently have projects underway across Canada, including in Nunavut and other interesting places in Northern Canada.

Our established firm is led by experienced and award-winning architects. We offer an exciting office environment with a fitness centre and staff lounge, as well as a comprehensive benefits package which includes profit sharing. Compensation is based upon experience and expertise. We invite you visit us in person or visit our web page at www.vernereimer.com.

We're looking for ambitious and skilled Intermediate and Senior Architects to join our talented team. Candidates must have an accredited M.Arch. with MAA registration preferred.

Primary responsibilities:

- Inspires a philosophy of creativity and critical thought.
- Design generation, design development and technical development.
- Evaluates, mentors and coaches design staff.
- Documentation of projects through all phases and coordination of consultants.
- Preparation for and participation in client meetings.
- Product and material research and vetting.
- Supports business development activities.
