We are looking for a creative and dedicated person to join our team!

Having an over-reaching purpose helps guide our practice. Our goal is to produce socially conscious architecture: spaces that inspire, heal, and nurture those who inhabit them. Our purpose is to design spaces that will be celebrated by their occupants. Spaces that promote innovation, foster community, give space for people to become the best person they can: this is what fuels our purpose and passion for what we do.

We complete design solutions at all scales: from community-oriented renovations of a few hundred square metres, to projects with budgets in the millions. We believe in the cultivation of wholistic architects. Each team member is trained to work on all aspects of the design process, from programming through construction administration.

We are looking for a registered architect or architectural intern with a minimum of 3 years of experience, well-versed with the National Building Code and Manitoba Amendments. The successful candidate should be passionate about sustainable design, well-skilled in technical aspects of the profession, and able to work cooperatively as part of a design team.

If you are interested in a position at this dynamic firm, please submit your resume in confidence to gail@picoarchitecture.com. We thank all applicants for their interest, however only those selected for an interview will be contacted.
