

ARCHITECT (TECHNICAL)

Republic is not your average design firm. Driven by the journey, we utilize an explorative process that connects all the right people around the table. Our desire to produce thoughtful and engaging projects is at the heart of everything we do.

If you've met our skilled team, visited our studio, or checked out our social media posts, you'll know we are unique. Dedicated to elevating and maintaining the health and well-being of our team, the studio is decked out with fitness equipment, and our work areas range from cozy café style lounge spaces to ergonomically friendly sit/stand desks. While the studio is an inviting and creative space, our work can happen anywhere – we also allow for remote work and flexible schedules.

As a member of the architectural team, the **Architect (Technical)** will be responsible for the development of enclosure designs for existing building remediations, upgrades, and new construction projects. This role includes:

- Collaborating with like-minded architects, interior designers, and technologists;
- Preparing written recommendations for remedial work, or assemblies for retrofit and new work;
- Preparing technical drawings for owner review and costing, tender and construction;
- Collaborating alongside a broad, multidisciplinary consultant team, and our client groups;
- Balancing a desire for design excellence, sustainability and cost effectiveness; and
- The opportunity to share knowledge with junior team members in a mentorship capacity.

Tell us why you're our next **Architect (Technical)**. Send your resume to:
careers@republicarchitecture.ca

Preference will be given to a well-rounded individual who strives to push design innovation through responsible and sustainable architecture and has demonstrated success in producing building projects with technical proficiency. Candidates shall have:

- Minimum five years of experience as a licensed professional with a Canadian provincial architectural association;
- Experience with BIM software, specifically Autodesk Revit is an asset;
- Exemplary technical design and problem solving skills;
- Broad experience with detailing and preparation of construction documents for a variety of types of building envelope projects, both new construction and renovations/retrofits; and
- A proven track record of maintaining high quality standards.
