## RECRUITING: PROJECT ARCHITECT

Work alongside some of the best architects in Winnipeg as part of our tight-knit team. We work in a supportive, fun-loving environment, where we work hard, and egos are set aside. We thrive on achieving incredible results, and value teamwork and passion above all else.

### WHY BLDG?

Established in 2008 by Karen Shanski, **BLDG ARCHITECTURE OFFICE INC.** is one of Winnipeg's most prolific and innovative design practices. With international experience in architecture and urban design, and a strong presence within the local market, BLDG's award-winning team is known for their creativity, collaboration, and ability to deliver outstanding projects.

Among other project types, **BLDG** is focused on mixed-use and multi-family housing design and development, with extensive experience delivering thousands of housing units over the last 10+ years. We are experts at delivering projects that address the economics of development and construction, housing affordability, and environmental performance. Most importantly, we make places where people want to live.

Join our dynamic team at **BLDG**, where diversity is woven into the very fabric of our culture. We ensure that every individual, regardless of race, colour, ancestry, religion, sex, national origin, sexual orientation, age, marital status, disability, or gender identity, is supported and respected. At **BLDG**, compensation packages reflect our commitment to offering fair wages that are benchmarked against market standards.

### WHO WE LOOK FOR:

5+ years of professional experience

Bachelor's or Master's Degree in Architecture

Canadian Architecture License

Proficiency in design phases from Schematic Design to Construction Administration

Experience with new builds as well as major additions and renovations

Strong ability to independently develop and coordinate detailed architectural construction documents

Excellent communication skills and fluency in English [spoken and written]

Strong understanding of construction methods and experience working with detailing standards, building codes, by-laws, and accessibility requirements

Proficiency with Revit, AutoCAD, Adobe and Microsoft Suites

Strength in conveying project objectives, narratives, and concepts

Capable of generating design options collaboratively and of taking the lead on project direction

Able to design collaboratively and also take lead on project direction

Excellent time management skills to handle evolving deadlines and client expectations
